
Malawi

ABSTRACT

With the support of the International Monetary Fund (IMF) and the World Bank, Malawi has been able to make important economic and structural reforms and sustain its economic growth rates over the last decade. The financial sector has remained largely stable, helped by the fact that it is largely not integrated into the global financial system. The country's banking sector remains well capitalized and profitable. Reforms have been undertaken in Malawi's financial sector in the past decade; and more recently, innovations have been implemented by various market players in an effort to expand the reach of financial services.

The study provides a detailed overview of the inclusive finance sector, contextualized in the political and socio-economic environment of the country. It is available for investors, donors and other participants of the sector who need to:

- evaluate new markets where to develop their activities;
- monitor the existing exposure in the country and deepen the knowledge of a market by spotting challenges and opportunities;
- identify FIs with a great potential for financing and technical support.
